

MedAire Trip Ready User Guide for iPhone

► Get Trip Ready:

Flight planning and travel risk management just got a whole lot easier. Assess and mitigate travel and safety risks for crew and passengers on your upcoming trips with the MedAire Trip Ready App for iPhone. Designed with pilots and flight departments in mind, Trip Ready allows users to see the medical and travel risk ratings, local time, current weather, and NOTAMS for each destination entered in their dashboard.

Trip Ready's alert notifications will keep pilots, crew and executives abreast of health and safety risks that may affect their itinerary. Alerts notify users of risks like disease outbreaks, civil unrest, and natural disasters and are provided advice to stay safe.

Note: The information displayed is based on a user's MedAire Membership Level.

► Downloading the App

If you have not already, you can download the app by going to <http://www.medaire.com/tripready>. Alternatively you can go to the App Store on your iPhone and search for MedAire.

► Logging-In

You will need your MedAire Membership Portal username and password to log into the Trip Ready app. Please contact your account manager if you do not have a username and password.

► Dashboard

You can store an unlimited number of destinations (ICAOs) on the dashboard. Most of the features in the app revolve around the destinations that are saved here. The Dashboard displays Zulu time as well as the destinations local time, medical and travel risk ratings, and current weather. Add a new ICAO to the dashboard by tapping the "Add" button in the top right corner. You can select new destinations to add by searching for ICAO, city name, or country. Tapping on the bulleted list icon at the top left corner allows you to view the following additional menu items: Reference & Training (this includes the First Aid Care: Quick Reference Checklist), A/C Medical Kit, World Calendar, View Tutorial, and Settings.

► Contact

The Contact page has important MedAire phone numbers. This includes 24/7 assistance through MedAire’s MedLink for in-flight assistance, and the Global Response Center for on-the-ground assistance while travelling. Tapping on any number will prompt a call to begin.

The “MedLink Checklist” button will open a new window that advises on the information you should be prepared to provide when calling regarding a medical event.

By tapping on the “Medical/Security Request” button at the bottom left of the screen you can request Trip Watches or additional information on a particular destination.

Find your account managers contact information by clicking the link at the bottom of the screen.

► Destination Folders

When you touch a destination from the Dashboard it will take you to the Destination Folders. The folder contains two different views: ICAO and Country.

ICAO View

The ICAO overview displays the local time, Zulu time, and travel and medical risk ratings. The folder contains weather, NOTAMS (from the FAA’s website), a lodging & dining search feature, conversion calculators, and a section to create and save notes.

Country View

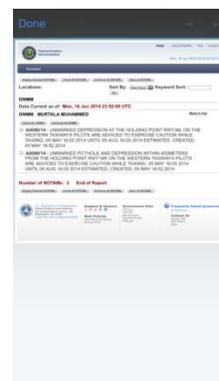

When you toggle to the Country folder you will have access to medical, security, and travel guides, country alerts, entry & exit requirements, and much more.

▶ Reference/Training

Tapping on the Reference/Training button from the additional menu bar (bulleted list icon at the top left of dashboard) will bring you to a menu allowing you to select the MedAire Training Schedule or one of the First Aid Care: In-flight Quick Reference Checklist chapters. This checklist is meant to supplement MedAire's Management of In-flight Illness and Injury Manual and the advice of a MedLink doctor, not replace it. Every chapter includes the phone number for MedAire's MedLink that when tapped will prompt a call to begin.

▶ World Calendar

The World Calendar displays relevant information regarding religious holidays, government holidays, and/or scheduled events that may cause disruptions in your upcoming itinerary.
