

Even Better Than “Back Home”

24/7 Ready-Access to Board-Certified Physician Specialists

There's no place like home...especially when you're not feeling well. But even “home” can't match the level of care available to international travelers and expatriate families through GlobalLifeline.

With just one phone call, GlobalLifeline provides 24/7, immediate access to a full range of medical assistance. Simple questions. Medical emergencies. Complex situations requiring the expertise of medical specialists. Through the innovative use of technology and years of experience in remote medical care, GlobalLifeline provides virtual “house calls” to any type of environment, anywhere in the world.

A portion of GlobalLifeline's solutions are provided in partnership with Banner Health System, a \$2.2 billion health care provider. It operates more than 30 hospitals and medical facilities in the United States including Good Samaritan Regional Medical Center, a tertiary care, level one trauma center that also houses a portion of the 24/7 GlobalLifeline Response Center.

Members of the Response Center's team of board-certified, practicing physicians are available at the Center managing client needs around the clock. If needed, they have ready access to a network of more

than 200 board-certified physicians providing expertise in more than 30 fields of medicine.

GlobalLifeline's specialists are also available for same day consultations to provide second opinions, medical record reviews and telemedicine consults. Specialties are available 24/7 and include: anesthesiology, cardiology, occupational environmental (chemical), cardiovascular surgery, colorectal surgery, burns, dermatology, endocrinology, gastroenterology, gynecology, gyne/onc, infectious disease, internal medicine, intensivists, laser and colposcopy, lithotripsy, neurology, neuro surgery, oncology, ophthalmology, oral/maxillofacial, ortho, otolaryngology (ENT), pain management, pediatrics, plastic surgery, pulmonary, perinatology, psychiatry, radiology, toxicology, trauma surgery, transplant and urology.

GlobalLifeline. It doesn't get any better than that – even “back home.”
