

THE PEDIATRIC SUPPLEMENTAL Rx KIT™

Protecting even the youngest of travelers

MedAire.
MedLink.

Emergencies happen without notice – at any time, in any location and to travelers of all ages.

To address the unique medical needs of children who are traveling away from home – by air or vessel – MedAire's international travel medicine and medical emergency professionals designed the Pediatric Supplemental Rx Kit.

Benefits

Because it is designed specifically for children under the age of 12, the Pediatric Supplemental Rx Kit allows first responders to treat common pediatric ailments with milder and lower-dosage medications. Contents treat a range of ailments:

- motion sickness
- allergic reactions
- fever
- burns
- infection
- cold/flu symptoms
- asthma
- inflammation
- diarrhea
- nausea
- dehydration
- nasal congestion
- teething/dental pain
- diaper rash/yeast infection

Key Features

Manage minor medical needs with the Pediatric Supplemental Rx Kit that provides:

- Portable to meet the needs of aviation and luxury yacht first responders
- Color-coded, moisture-resistant soft shell pack
- Clear window for rapid identification of items
- Lightweight and compact design for easy stowage (10.5 x 14 x 6 inches, weighing 9.2 lbs.)
- Kit content card and user's guide detailing usage, dosage recommendations and side effect information, primarily for over-the-counter medications
- Spare pocket for storing documentation
- Extra space for storing personal prescriptions
- Assembled under MedAire's ISO 9001:2000 quality assurance program

The Pediatric Supplemental Rx Kit is only to be used in conjunction with MedAire's Aircraft First Aid Kit and the MedLink Maritime First Responder Kit, and under the direction of a MedLink physician.
